

AUTUMN 2026

Your guide to the term ahead

Welcome to Year 6

Mr Jaspaal

Jupiter Class Teacher

Ms Mas

Jupiter Class Teacher

Ms Noor

Venus Class Teacher

We are also supported by **Ms Dias, Ms Sedani, Mr Ross, Coach Ernest, Ms Parks & Mrs Soysa**

Help at Home

Encouraging your child to read for 10 minutes a day and ask your child to tell you about characters, events and new vocabulary.

Practise to build fluency with times tables up to 12 using Times Table Rock Stars. Aim for an average speed of 2 seconds or less!

Ask your child what they have been learning this week. Can they teach you something new?

Encourage your child to pack and bring their own school bag and to remember what they need each day.

Good to Know

Dress for **PE** on **Tuesdays** and **Wednesdays**.

Please ensure children are in correct uniform.

Library books are changed on **Wednesdays**.

Spelling tests will be taken on **Fridays**.

Key Dates

Half Term

26th – 30th October

Jupiter Class Assembly:

9th October 2026

Residential trip:

2–6th November 2026

Venus Class Assembly:

20th November 2026

Our Learning this Term

Here is an overview of the exciting learning taking place in Year 6 this term.

English

Reading

This term, we will grow in confidence as readers, developing our fluency, expression and understanding as we read a wide range of texts. We will explore new vocabulary, discuss what we have read and develop our skills in answering reading questions, using clues from the text to explain, predict, infer and share our ideas.

Writing

As writers, we will develop our confidence as writers through exciting stories and non-fiction writing, starting with Macbeth. We will develop characters through ambitious vocabulary and description, organise our ideas effectively and use a range of sentence structures. In our second term, we will explore an adapted biography of Anne Frank, developing our skills in writing informative and engaging non-fiction. Along the way, we will strengthen our spelling, punctuation and grammar.

Maths

We will develop our confidence with numbers, exploring place value and working with numbers up to 10 million. We will strengthen our addition, subtraction, multiplication and division skills, using formal written methods and applying them to problems. We will develop our understanding of fractions, including equivalent fractions, comparing and ordering and adding and subtracting fractions. We will also explore decimals, rounding and comparing decimal numbers.

Science

In science lessons, we will become curious scientists, exploring living things and their habitats and learning how to classify plants and animals using classification keys. We will discover how living things depend on one another and explore electricity, including how circuits work and how different components affect them. We will ask questions, make observations and explain what we discover.

Foundation Subjects

This term, we will explore the United Kingdom through geography, using maps and atlases to investigate its countries, regions, cities, landscapes and physical features. In history, we will study World War II, exploring key events, significant people and how the war affected life in Britain and around the world.

In PSHE, we will learn how our bodies and emotions change as we grow, developing our understanding of healthy relationships, personal wellbeing and making positive choices. In Computing, we will learn how computer networks work, develop our understanding of online safety and use graphs to collect, represent and interpret data.
